NOAA Seeks Public Comment on Grouper/Tilefish IFQ

The Gulf Council submitted Reef Fish Amendment 29 to NOAA Fisheries Service for review, approval, and implementation. The Amendment was developed to rationalize effort and reduce overcapacity in the commercial grouper and tilefish fisheries to achieve and maintain optimum yield.

Written comments must be received by 5 p.m. EST, on June 8, 2009 and can be submitted as follows:

Electronic: www.regulations.gov
Enter NOAA-NMFS-2008-0223 in the keyword search and check the box "send a comment or submission."

Sea Turtle Interactions With Bottom Longline Gear

The Gulf Council at its April meeting reviewed a draft of Reef Fish Amendment 31 and selected preferred alternatives for proposed management actions intended to reduce the number of sea turtle interactions with bottom longline fishing gear in the reef fish fishery of the Gulf of Mexico.

Management actions contained in the amendment include:

- Allowing or prohibiting the use of squid as bait in the bottom longline fishery
- Longline time/area closures
- Longline endorsements to fish east of Cape San Blas
- Modifications to fishing practices and gear
- Framework modification for total allowable catch

Some of the preferred alternatives selected by the Council so far call for the prohibition of bottom longline fishing shoreward of 35 fathoms in the eastern Gulf of Mexico from June through August.

In considering a longline endorsement, the Council's preferred alternative will require a minimum 40,000 pounds annual average of reef fish landings using longline gear between 1999 and 2007, in order to qualify for the endorsement.

A series of public hearings will be held throughout the Gulf coast in May and June.

According to a 2006-2008 NOAA Fisheries Service report, the number of threatened loggerhead sea turtles

[See Turtles, page 2](#)

Recreational Red Snapper Fishery Opens June 1

The 2009 recreational red snapper season will open June 1 and close at 12:01 a.m. August 15, 2009, as long as the State of Florida agrees to adopt compatible regulations. Early indications are that the state will comply.

An early closure is necessary because new data shows that the 2008 recreational catch in the Gulf exceeded the quota

[See Red Snapper, page 9](#)

Turtles *from page 1*

that have been caught in the bottom longline fishery has exceeded authorized levels.

The Council is required by the Endangered Species Act to take action to provide protection for threatened loggerhead sea turtles from interactions with fishing gear. Similarly, National Standard 9 of the Magnuson-Stevens Fishery Conservation and Management Act requires the Council to reduce bycatch to the extent practicable, and where it cannot be reduced, to reduce bycatch mortality.

Photo credit: Cathy Readinger

In January, the Council requested an emergency rule that would address the issue in the short-term. That rule will temporarily close the bottom longline fishery in waters less than 50 fathoms for the entire eastern Gulf of Mexico and will become effective May 18, 2009.

Additionally, during the 2009 fishing year while the emergency longline closure is in effect, once the 2009 deep-water grouper quota is caught reef fish bottom longline gear will be prohibited in the eastern Gulf of Mexico (east of Cape San Blas).

The emergency can remain in effect for 180 days, but the Council has requested that NOAA Fisheries end the emergency action as soon as possible if the biological opinion currently under development indicates that actions outlined in Amendment 31 will sufficiently address the turtle bycatch issue in the longline fishery.

The updated biological opinion is expected to be completed by August.

Accountability Measures and Annual Catch Limits Update

The Gulf Council is currently developing a generic amendment to implement catch limits (ACLs) and accountability measures (AMs) for the remainder of the stocks it manages. For stocks managed jointly by the South Atlantic and Gulf Councils (coastal migratory pelagics and spiny lobster) separate joint ACL amendments will be developed.

The new provisions of the Magnuson-Stevens Act require the Gulf Council to set annual catch limits for stocks managed under its fishery management plans to ensure that overfishing does not occur.

In the event that the catch limits are exceeded, accountability measures are predetermined actions to either prevent further catches in the current fishing year or return catches to the specified levels in the following year, depending upon the availability of real-time data and the current status of the stock.

Additionally, the Council is required to prevent overfishing and rebuild stocks to levels that will support maximum sustainable yield - the largest catch that can be taken from a stock over an indefinite period.

Annual catch limits must be established by 2010 for all fisheries where overfishing is occurring, and by 2011 for all other fisheries.

Council staff is drafting a scoping document to discuss the new requirements and possible approaches to establishing ACLs and AMs. A draft scoping document is tentatively scheduled for review by the Council in June. Scoping meetings will be held later this summer to garner public input.

The Council has established ACLs and AMs for stocks that are classified as overfished or undergoing overfishing (greater amberjack, gray triggerfish, red snapper and gag), as well as for red grouper. These ACLs are subject to adjustment when new stock assessments are completed.

Corky Perret, longtime Council member, to receive Charles H. Lyles Award

William S. "Corky" Perret was selected in March by the Gulf States Marine Fisheries Commission (GSMFC) to receive the prestigious *Charles H. Lyles Award*.

Perret's career has spanned over four decades. After receiving both a Bachelor of Science and Masters degrees from the University of Louisiana at Lafayette, he went to work for Louisiana Wildlife and Fisheries at its marine laboratory on Grand Terre.

He progressively held more and more responsible positions under several Louisiana Governors, culminating his time in Louisiana as the Assistant Secretary position in charge of all fisheries, both freshwater and marine, in 1995 under then Governor Foster. After 30 years of service, Perret went to work for the Mississippi Department of Marine Resources as Director of Marine Fisheries. He held that position until about two years ago when he advanced to Deputy Director of the Mississippi Department of Marine Resources.

The *Charles H. Lyles Award* is presented yearly by the GSMFC to an individual, agency, or organization that has contributed to the betterment of the fisheries of the

Gulf of Mexico through significant biological, industrial, legislative, enforcement or administrative activities.

The GSMFC has, since 1984, selected eminently qualified individuals active in marine fisheries whose careers and contributions to Gulf fisheries are worthy of being labeled "fishery giants." Perret will join the prestigious elite of Congressmen, scientists, administrators, enforcement, businessmen and fishermen who have received this award.

Corky Perret, Deputy Director, MDMR and Gulf Council Member

"I have always been fortunate enough to be associated with good, energetic people," said Perret.

Perret will be presented with the award during the October meeting of the GSMFC.

Gulf of Mexico Fishery Closures

Recreational Closures:

Red Snapper

Recreational red snapper season closed at 12:01 a.m. local time August 5, 2008. The season will reopen June 1, 2009, the beginning of the 2009 federal recreational red snapper fishing season.

Commercial Closures:

King Mackerel

The commercial fishery for Gulf group king mackerel in the southern Florida west coast subzone is closed effective 12:01 a.m., local time, February 28, 2009, for commercial hook-and-line vessels. The closure will remain in effect through the end of the fishing year, June 30, 2009.

NOAA Fisheries Service reminds fishermen the boundary between the Atlantic and Gulf groups of king mackerel shifts, beginning April 1, 2009, from 29° 25' N. latitude (a line directly east of the Flagler/Volusia County line on the Florida east coast) to 25° 48' N. latitude (a line directly west of the Monroe/Collier County line on the Florida west coast). This change also affects daily commercial trip limits.

The commercial fishery for Gulf group king mackerel in the western zone is closed effective 12:00 noon (local time) March 27, 2009 through June 30, 2009.

The commercial run-around gillnet fishery for Gulf group king mackerel in the southern Florida west coast subzone is closed effective 6 a.m. local time, January 30, 2009, through January 19, 2010.

June Council Meeting Reminder

The Council will be meeting the week of June 15 - 18, 2009 at the Quorum Hotel in Tampa, Florida. Please make your reservation under the GMFMC room block to receive the special discounted room rate.

When the Council travels, the deadline for comments is moved up a day in order to accommodate packing and shipping of materials to our meeting location.

Submission of written comments and materials to be included as part of the briefing book materials for this meeting **MUST BE RECEIVED** by 5:00 p.m. EDT June 10, 2009

If you miss the deadline and bring your own copies to the meeting, please bring at least 30 copies for the Council. If you wish for your materials to be made available to the public, please bring additional copies.

A draft agenda can be found on page 6.

Committee Agenda
Gulf of Mexico Fishery Management Council

The Quorum Hotel
Tampa, FL
June 15 - 17, 2009

Monday, June 15, 2009

1:00 p.m. - 2:00 p.m.

Outreach and Education Committee

- * Report from the O&E AP Meeting
- * Update on Efforts to Provide Online Coverage of Council Meetings

2:00 p.m. - 2:30 p.m.

AP Selection Committee

- * Review of Advisory Panels in Relation to Potential Reef Fish IFQ AP

2:30 p.m. - 3:30 p.m.

Budget/Personnel Committee

- * Review of 2009 Budget
- * Review of 5-year Budget
- * Status of SSC Stipends
- * Report of the Administrative Officer's Meeting

3:30 p.m. - 4:00 p.m.

Administrative Policy Committee

- * Comments on Proposed Rule on Council Operations

4:00 p.m. - 5:00 p.m.

Mackerel Management Committee

- * Scoping Document for Joint Mackerel Amendment 18
- * Selection of Scoping Meeting Locations

5:00 p.m. - 5:30 p.m.

Spiny Lobster/Stone Crab Management Committee

- * Scoping Document for Joint Spiny Lobster Amendment 9
- * Selection of Scoping Meeting Locations

Tuesday, June 16, 2009

8:30 a.m. - 10:30 a.m.

Data Collection Committee

- * Report of the GSMFC FIN Meeting
- * Presentation on the Louisiana Pilot Charterboat Survey Program
- * Status Report from the SEDAR Steering Committee Meeting
- * Status Report on MRIP Program

10:30 a.m. - Noon and 1:30 p.m. - 5:30 p.m.

Reef Fish Management Committee

- * Final Action on Draft Reef Fish Amendment 31/DEIS
- * Status of the Emergency Rule for Longlining
- * Presentation on "Is There a Better Way to Manage U.S. Shared Commercial and Recreational Fisheries"
- * Presentation on "Evaluating Approaches to Managing Marine Recreational Fisheries"
- * Discussion of Initiating Action to Encompass all Remaining Reef Fish into an IFQ Program
- * Gag/Red Grouper Update Assessment
- * Discuss Holding SSC Workshop on Venting Fishes
- * Status of Goliath Grouper Research/Assessment Preparation

5:30 p.m. - 6:30 p.m.

Informal Q&A Session on Gulf of Mexico Fishery Management Issues

Wednesday, June 17, 2009

8:30 a.m. - 11:00 a.m.

Sustainable Fisheries/Ecosystem Committee

- * Scoping Document for Generic ACL/AM Amendment
- * Selection of Scoping Hearing Locations
- * Report of the CRCP Meeting

¹The established times for addressing items on the Council and committee agendas, except for those setting times for public testimony or open public comment, may be adjusted as necessary to accommodate the timely completion of discussion relevant to the agenda items. Such adjustments may result in the meeting being extended from, or completed prior to the date established by these agendas.

Next Meeting:

August 11 - 14, 2009

Perdido Beach Resort

Orange Beach, Alabama

Council Agenda
Gulf of Mexico Fishery Management Council

The Quorum Hotel
Tampa, FL
June 17 - 18, 2009

Wednesday, June 17, 2009

I. Call to Order and Introductions - Mcllwain

II. Adoption of Agenda ¹ - Mcllwain

III. Approval of Minutes - Mcllwain
(1:00 p.m. - 1:15 p.m.)

IV. Public Testimony ^{2,3} - Mcllwain

- a. Exempted Fishing Permits (EFP) (if any)
- b. Final Action on Reef Fish Amendment 31
- b. Open Public Comment Period ^{2,4}
(1:15 p.m. - 5:30 p.m.)

Thursday, June 18, 2009

V. Committee Reports

- a. Reef Fish Management - Minton
(8:30 a.m. - 10:30 a.m.)
- b. Outreach and Education - Walker
(10:30 a.m. - 10:45 a.m.)
- c. AP Selection Committee - Perret
(10:45 a.m. - 11:00 a.m.)
- d. Budget/Personnel Committee - Shipp
(11:00 a.m. - 11:15 a.m.)
- e. Administrative Policy Committee - Morris
(11:15 a.m. - 11:30 a.m.)
- f. Mackerel Management - Teehan
(11:30 a.m. - 11:45 a.m.)
- g. Spiny Lobster Management - Teehan
(11:45 a.m. - Noon)
- h. Data Collection - Riechers
(1:30 p.m. - 1:45 p.m.)
- i. Sustainable Fisheries/Ecosystem - Gill
(1:45 p.m. - 2:15 p.m.)

VI. Other Business

- a. Report of the CCC Meeting
- b. Written Reports
- c. Other Items
(2:15 p.m. - 3:00 p.m.)

²Persons wishing to testify for either public testimony or open public comment must turn in a registration card before the beginning of the public testimony period; otherwise persons wishing to testify may be denied. One card must be completed for each issue on which persons wish to testify.

³Persons wishing Council members to have copies of written testimony or information should provide 30 copies to staff for distribution to members. All written information shall include a statement of the source and date of such information. Any oral or written statement shall include a brief description of the background and interests of the person testifying.

⁴The Council has set aside this time for open public comment regarding any fishery issue or concern. People wishing to speak before the Council should complete a public comment card, making sure to check the box marked Open Public Comment. A note about open public comment: In the interest of giving everyone an opportunity to speak, speakers are asked to limit comments to three minutes. If your sentiments are reflected in comments made by others, please state so and allow the next speaker to address the Council. Individuals may be asked to reduce speaking time even further in order to accommodate all those who wish to speak. The open public comment period will end no later than the time scheduled on the agenda regardless of the number of persons wishing to comment.

Red Snapper *(continued from page 1)*

by approximately 1.2 million pounds, and Federal rules require a reduction in harvest when the quota is met or projected to be met.

Red snapper are overfished and undergoing overfishing in the Gulf. Shortening the fishing season will reduce the harvest of Gulf red snapper and help rebuild the fishery's population.

New Regulations for Gulf Grouper Effective May 18, 2009

NOAA Fisheries Service published a final rule implementing new regulations to end overfishing of gag and revise shallow-water grouper (SWG) management measures. The final rule published in the Federal Register on April 16, 2009, and becomes effective May 18, 2009.

These measures are outlined in Amendment 30B to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico submitted by the Gulf of Mexico Fishery Management Council (Council).

Elements of the Rule

For the recreational fishery, the rule:

- Establishes annual catch limits (ACLs) and accountability measures (AMs) for gag and red grouper.
- Reduces the gag bag limit to two fish per person per day and the aggregate grouper bag limit to four fish per person per day.
- Increases the red grouper bag limit to two per person per day.
- Extends the closed season for recreational shallow-water grouper to February 1 through March 31.

For the commercial fishery, the rule:

- Establishes ACLs and AMs for gag, red grouper, and SWG.
- Establishes a commercial quota for gag of 1.32 million pounds (mp) in 2009, 1.41 mp in 2010, and 1.49 mp in 2011.
- Increases the commercial quota for red grouper to 5.75 mp.
- Sets the SWG quota as the sum of the gag and red grouper quotas with an additional 0.41 mp allowance for other SWG species.
- Establishes an incidental bycatch allowance trip limit for commercial gag and red grouper of 200 pounds for the species that first reaches 80 percent of its quota.
- Reduces the commercial minimum size limit for red grouper from 20 inches to 18 inches total length to reduce bycatch.
- Ends the February 15 to March 15 season closure in favor of a four month closure of "The Edges" that applies to both commercial and recreational fishing. (see *The Edges Note*.)

The rule also:

- Eliminates the end date for the Madison-Swanson and Steamboat Lumps marine reserves.
- Requires a person aboard a federally-permitted Gulf of Mexico commercial or for-hire reef fish vessel to comply with federal regulations for reef fish species regardless of where the fish are harvested to increase compliance with federal regulations.

The Edges Note

Because the proposed rule for Amendment 30B contained an error relative to the "The Edges" seasonal area closure, that measure was removed from the final rule. "The Edges" seasonal-area closure from January 1 through April 30, which applies to commercial and recreational fishing, is contained in a separate proposed rule published in the Federal Register on April 17, 2009 and has a 15-day comment period.

Gulf of Mexico Grouper	Current Regulations	New Regulations (as of 5/18/2009)
<i>Recreational measures</i>		
Grouper Aggregate Bag Limit	5 per person/day	4 per person/day
Gag Bag Limit	2 per person/day within 5-fish grouper aggregate	2 per person/day within 4-fish grouper aggregate
Red Grouper Bag Limit	1 per person/day within 5-fish grouper aggregate	2 per person/day within 4-fish grouper aggregate
Recreational Season	Red & black grouper closed 2/15-3/14 Gag closed 2/1-3/31	All shallow water grouper (gag, red, black, yellowfin, yellowmouth, rock hind, red hind, & scamp) closed 2/1-3/31
<i>Commercial measures</i>		
Red Grouper Minimum Size Limit	20" total length	18" total length
Gag Quota	1.32 mp (GW)*	1.32 mp (GW)
Red Grouper Quota	5.31 mp (GW)	5.75 mp (GW)
Shallow-Water Grouper Quota	7.48 mp (GW)	7.48 mp (GW)
Commercial Season	Gag, red & black grouper closed 2/15-3/14	No closed season

*GW – gutted weight; mp – million pounds

The Gulf Council would like to hear from you! Please contact us regarding fishery questions, comments, or concerns you would like to see covered in the **Gulf Fishery News**. Anyone interested in submitting information, such as articles, editorials, or photographs pertaining to fishing or fisheries management is encouraged to do so. Submissions may be mailed to Charlene Ponce, Public Information Officer, Gulf of Mexico Fishery Management Council, 2203 N. Lois Avenue, Suite 1100, Tampa, FL 33607. Materials can also be sent via fax to 813-348-1711, or by e-mail to charlene.ponce@gulfcouncil.org.

The Gulf of Mexico Fishery Management Council is one of eight regional fishery management councils established by the Magnuson-Stevens Fishery Conservation and Management Act of 1976. The Council is responsible for the development and modification of fishery management plans (FMPs) that are designed to manage fishery resources in the exclusive economic zone (EEZ) of the Gulf of Mexico from state boundaries to the 200-mile limit.
